<u>Approved by</u>	<u>IMQ S.p.A.</u>

INTRODUCTION

Congratulations on your certification!

You can now use the IMQ marks related to the certification you have achieved and enhance the commitment dedicated to verifying the quality of your work.

The certification issued by IMQ protects companies, constitutes useful information for control Authorities and, ever more frequently, is one of the requirements to participate in competitions and tenders.

It is the visible guarantee of your quality, because behind each certification lies a well-structured qualification process verified by a third party.

It bears witness to the "promise of transparency" made to the market at the moment in which you have decided to become certified.

It is therefore important to give visibility to the certification achieved, reproducing the relevant marks, wherever this is required by the Regulation that governs your certification, according to the criteria and the methods set out in the pages below.

ARTICLE 1- General Rules

1.1 GRANTING USE OF THE MARKS

As and from the date of issue of the certificate, the Concessionaire, the Organisation, the Professional figure (hereinafter "IMQ Customer") has the right to use the marks granted by IMQ (hereinafter "marks").

The marks are legally registered as collective marks; all the rights deriving from these registrations are reserved to the legal party which has registered them.

1.2 PROVISIONS FOR USE OF THE MARKS

The marks can be used:

- only with reference to the single certification scheme or to the certification schemes for which the relevant certification has been achieved
- with the clear identification of the subject matter (product, organisation, competence,...) of the certification;
- in the period of validity of the certificate;
- attributing the correct meaning to the certification which the marks attest to;
- complying with the specific indications for each type of certification, shown at article 2, 3, 4, 5 and 6 of this Regulation.

1.3 CONTROL OVER THE USE OF THE MARKS

IMQ is required to monitor the correct usage of the certification issued and relevant marks. To this end the IMQ Customer can send the marketing department of IMQ (mkt@imq.it) a copy of the business documentation for approval prior to publication. This takes the form of catalogues, advertising tools, contracts or other forms of communication which it intends to issue to publicise the attainment of the certification.

1.4 INCORRECT USE OF THE MARKS AND OF THE CERTIFICATION

The marks and the certification are misused if they deceive the message recipients, damage the reputation of IMQ and compromise the trust of the public, or rather when the same are not used in accordance with this Regulation.

In particular, by way of example, the IMQ Customer cannot use the mark and/or certification, when:

- the certification has not been issued;
- the certification has still to be issued (the requesting party CANNOT publicise the request for certification until it has been granted the relevant right to use the mark. Nevertheless, in particular cases – which must be adequately motivated – for example, participation in public tenders – IMQ may allow the requesting party to inform the interested party that the request for certification has been transmitted to IMQ);
- the certification has been revoked (or suspended, where indicated in the provision for suspension);
- the marks are matched with products/activities/services.. which are not covered by the certification;
- in the case of product mark, during the period of validity of the procedure "On-call inspections" (see "IMQ Marks – General Regulation for the Certification of products"), the IMQ Customer issues certified products on the market which have not been controlled by IMQ;
- in the case of product mark, if the marks are used in such a way as to be interpreted as marks of conformity to standards of organisation management systems;
- in the case of system mark, if the marks are applied to test, calibration or inspection reports or certificates issued by the certified Organisation;
- in the case of system mark, if the marks are applied to products and to relevant packaging* and/or type labels, and/or identification plates or, in any case, they are used in a way to be interpreted as indications of product conformity, including cases in which the product is represented by documents issued by the Organisation (e.g. analysis certificates, medical reports, certificates of conformity, etc.).

* *Packaging is a term used to describe what can be removed without the product being disintegrated or damaged. On the packages and the accompanying information, the Organization can use only one declaration regarding the possession of the Management System certification, which must include the following references: identification of the certified Organisation; type of Management System (e.g. quality, environment) and applicable standard; identification of IMQ as Certification Body.*

**1.5
INCORRECT USE
OF THE MARKS AND
OF CERTIFICATION:
IMQ ACTIONS**

In the event of misuse, IMQ will take all the measures necessary to stop this, protecting its right in the most appropriate manner, including through the publication of the occurrence on its own communication media and, where necessary, on the press.

ARTICLE 2 - Marks related to product certification

2.1 WHERE THEY CAN BE REPRODUCED

The IMQ marks related to product certification can be affixed to:

- certified products (**reproduction of the mark on certified products is compulsory**)
- packaging of certified products
- promotional labels of certified products
- instruction booklets and on the factsheet of the certified product
- advertising material, when the product advertised has achieved IMQ certification
- catalogues, but only in correspondence to the certified products or specifying which products have achieved certification
- Internet sites, in correspondence to the certified products
- company brochures, specifying to which products the IMQ certification refers.

2.2 WHERE THEY CANNOT BE REPRODUCED

The IMQ marks related to product certification cannot be shown on:

- letter paper, invoices, business cards, e-mails, motor vehicles and in any publication and communication in which it is not possible to specify to which products the IMQ certification refers.
- catalogues of non-certified products, even if one or more components are IMQ certified.

2.3 HOW THEY SHOULD BE REPRODUCED

- **size:** the IMQ marks can be reproduced in the size required, but they must always be perfectly legible (their minimum size should NOT be less than 10 mm), without altering the proportions between base and height).

- **COLOURS:** the marks can be reproduced in colour (in the colours specified beside each mark) in black/white, in black (grey) screens, in negative.

The directions set out at Article 1 of this Regulation are an integral part of the user directions set out below

Code	Denomination	Colour
PRD01	IMQ	pantone 354 c 80% y 80% #29b56b

Products

Cables

ON THE PLATE, WHERE PRESENT, OR ON THE PACKAGE OF THE CABLES THE PRD01 MARK IS AN ALTERNATIVE TO THE PRD05 AND PRD06 MARKS.

Self-adhesive tapes and accessories for electrical use: gloves and mittens made of insulating material for live working, elements to identify terminal boxes and the termination of cables, ties for cables of electrical installations, flexible insulating sheaths, terminators and connectors for cables, LV cable joints.

LV protective equipment, appliances and apparatus

FOR SMALL PRODUCTS, INTENDED PRIMARILY FOR EQUIPMENT MANUFACTURERS, THE PRD01 MARK CAN BE PLACED ON THE MINIMUM PACKAGING OF THE PRODUCT.

SPECIAL REQUIREMENT FOR "CORDS FOR CONNECTORS INDISSOLUBLY CONNECTED TO THE CABLE": THE PRD01 MARK CAN BE PLACED ON ONLY ONE OF THE COMPONENTS OF THE CABLED UNIT, WITH THE EXCEPTION OF THE CABLE.

SPECIAL REQUIREMENT FOR "PIPES": THE PRD01 MARK MUST BE PLACED ALONG A GENERATOR USING THE SAME METHODS PROVIDED FOR BY THE STANDARDS FOR OTHERS OVERWRITTEN. THE MARK MUST ALSO BE SHOWN ON THE LABEL APPLIED TO EACH ORIGINAL PACKAGING OF THE MANUFACTURER. THE PRD01 MARK IS ALTERNATIVE TO THE PRD05 MARK.

SPECIAL REQUIREMENT FOR "ACCESSORIES FOR PIPE SYSTEMS": THE PRD01 MARK MUST ALSO BE AFFIXED TO THE ACCESSORIES, ALWAYS ACCORDING TO WHAT IS PROVIDED FOR BY THE RELEVANT STANDARDS.

LV equipment and apparatus: packaged products (blister).

BESIDES THE PRD01 MARK IT IS POSSIBLE TO USE THE ALTERNATIVE PRD04 MARK.

Luminaires and related accessories

Household and similar electric equipment

Capacitors and filters

IN THE EVENT THAT THE COMPONENT IS SMALL AND ONLY IN EXCEPTIONAL CASES, THE GENERAL RULE WHICH STATES THAT PRODUCTS GRANTED USE OF THE IMQ MARK MUST BE IDENTIFIED BY THE PRESENCE OF THE PRD01 MARK CAN BE WAIVED. THIS EXCEPTION CAN ONLY BE GRANTED ON THE SPECIFIC REQUEST OF THE MANUFACTURER, WHO DOCUMENTS THE PHYSICAL IMPOSSIBILITY OF APPLYING SUCH A MARK. IN THESE CASES THE PRD01 MARK MUST STILL BE SHOWN ON THE PACKAGING OF THE COMPONENTS.

Medical, laboratory and aesthetic equipment

EN xxxxx-X*

(*): distinct number of the EN standard/s with which the product complies.

Products

Electronic appliances

IMQ CAN IMPOSE THE USE OF THE PRD02 MARK FOR SEVERAL TYPES OF PRODUCTS FOR WHICH IT IS NECESSARY TO HIGHLIGHT THE SAFETY STANDARD WITH WHICH THEY COMPLY. FOR POWER SUPPLY UNITS, IN PARTICULAR, THE PRD02 MARK MUST BE USED INDICATING THE RELEVANT EN STANDARD (EN 60065 OR EN 61010-1 OR EN 60950-1). INSERTION OF THE REFERENCE STANDARD IS THE RESPONSIBILITY OF THE IMQ CUSTOMER. REFERENCE TO THE STANDARD SHOULD BE AFFIXED UNDER THE PRD02 MARK, IN LEGIBLE DIMENSIONS, IN AN AREA WHICH IS CENTRED TO THE MARK AND THE WIDTH SHOULD NOT BE LARGER THAN THAT OF THE MARK.

PRD29 CE-0051

Mark to use when IMQ, as Notified Body, has verified compliance with the applicable directive.

The CE 0051 mark must measure at least 5 mm in height and maintain the initial proportions in case of enlargements; nevertheless, according to the requirements set out in different directives, the minimum size can be halved for small devices or components. If the final characteristics of the product or its processing does not in any case allow the application of the mark directly to the product, it must be applied to the package or to the accompanying documents.

SPECIAL REQUIREMENTS RED DIRECTIVE

The identification number of the Notified Body – 0051 must be affixed at the same height as the CE symbol.

In the event of products with restrictions of use for certain Countries, the symbol "alert", indicated here at the side, should also be affixed beside the CE0051 mark at the same height of the CE.

Matching with IMQ logo

If you want to highlight the intervention of IMQ as Notified Body according to the applicable directive, it is possible to do so by keeping to the following formula and showing the IMQ logo as indicated below:

Compliance according to Directive XXX verified by Notified Body CE 0051

the IMQ logo can be printed in black, in black screens, in negative or, if in colour, possibly in:

ARTICLE 3 - Marks related to management system certifications and attestations

3.1 WHERE THEY CAN BE REPRODUCED

On the IMQ Customer documents (e.g. letter paper, commercial publications, email, financial statements and monographs...) at fairs, on business vehicles, company web-site.. and on advertising material pertaining to the activity of the IMQ Customer as long as it occurs in a truthful manner and is complete of the data relating to the certifica-

3.2 WHERE THEY CANNOT BE REPRODUCED

On test, calibration or inspection reports or certificates issued by the certified Organisation; on products and on relevant packaging*, and/or type labels, and/or identification labels or, in any case, used in a way to be interpreted as indications of product conformity, including the cases where the product is represented by documents issued by the Organisation (e.g. analysis certificates, medical reports, certificates of conformity, etc.).

* TO DEFINE PACKAGING SEE ARTICLE 1.4

3.3 HOW THEY SHOULD BE REPRODUCED

The IMQ Customer can only use the "CSQ" mark:

- with the name of the certified Organisation (or with the name of the operative unit of the certified Organisation);
- with the certificate identification number (optional);
- with reference to the standard or standards for which the certification was achieved, to affix under the CSQ mark, in a legible size, in an area which is centred to that of the mark (see examples at the side). It is recommended to make reference to the edition of the standard (e.g. 2015);
- within the purpose/activity of the certified Organisation (or of the operative unit): in case of reduction in the certification application field, the Organisation must rectify the information concerning the certification which may be applied to its advertising materials.
- in relation to the certified operative unit/s of the Organisation;
- **sizes:** the marks can be reproduced in the size required, but must always be perfectly legible, (their minimum size CANNOT be less than 10 mm) without changing the proportions between the base and height;

- **colours:** the marks can be reproduced in colour (in the colours specified beside each mark) in white/black, in black (grey) screens, in negative.

ARTICOLO 4 - Marks related to the certification of professional figures

4.1 WHERE THEY CAN AND CANNOT BE REPRODUCED

The IMQ mark, with reference to the certification achieved, can be used on headed paper, business cards, Internet sites, personalization of vehicles, in short on all the documents or advertising material produced by the IMQ Customer, as long as this occurs in a truthful manner and is complete of data relating to the certification. They cannot be affixed to certificate documents issued by the same to prevent the certification of the professional figure being confused with a plant or system certification.

4.2 HOW THEY SHOULD BE REPRODUCED

The IMQ Customer can only use the "IMQ" mark related to the certification of professional figures:

- with the name of the certified person;
- with the identification number of the certificate (obligatory for PRS01 mark, optional for other marks);
- with reference to the standard or standards for which the certification was achieved;
- **size:** the marks can be reproduced in the size required, but must always be perfectly legible, (their minimum size should NOT be less than 10 mm) without changing the proportions between the base and height;

- **colours:** colours: the marks can be reproduced in colour (in the colours specified beside each mark) in white/black, in black (grey), screens, in negative.

ARTICLE 5 - Marks related to the certification of businesses that install and verify

5.1 WHERE THEY CAN BE REPRODUCED

The IMP01, IMP02 and IMP03 marks can be used, referring exclusively to the scope of validity of the certification achieved, on headed paper, business cards, Internet sites, personalisation of vehicles, in short on all documents or promotional material relating to its activity as long as this occurs in a truthful manner and is complete of data relating to the specific certification scheme.

The IMP04 and IMP05 marks, relating to the verification by IMQ of lifts and earthing systems, can be used in reference to the verified systems (for example by means of self-adhesive labels to apply in the lift car or in the control cabinet of the earthing system).

5.2 HOW THEY SHOULD BE REPRODUCED

The IMQ customer can only use the "IMP01, "IMP02" and "IMP03" mark:

- with the name of the certified business;
- with the certificate identification number (optional);
- with reference to the scheme to which the certification refers;
- in relation to the certified operative unit of the organisation.

The IMQ Customer can only use the "IMP04" and "IMP05" mark: :

- with reference to the verified system and related to the activity of periodic verification
- **Size:** the marks can be reproduced in the size required, as long as they are always perfectly legible, without altering the proportions between base and height. base e altezza.

- **Colour:** the marks can be reproduced in colour (in the colours specified beside each mark) in white/black, in black (grey) screens, in negative.
